Guilherme Santos D'Alessandro

Work Experience

Software Engineer II

IBM Brazil | 2022 - Present

Part of the top talent program

- Leading the development of a project and improving the NPS while doing it
- Working on a global project with teammates from all accross the globe that is changing how innersource is made inside IBM
- Developing reusable and maintainable components for mobile applications
- Transforming business rules in accomplishable, easy to understand and well-scoped user stories for my teammates
- Being the focal point of monitoring for the squad
- Managing iterations on the absence of the IM
- Ensuring the applications are accessible following the W3 WAI guidelines
- Creating new and innovative reports for the PO
- Developing complex queries for relational and NoSQL databases
- Designing disaster recovery plans for mobile applications and microservices architecture
- Documenting REST APIs with Swagger following the OpenAPI 3.0 guidelines
- Using and abusing of the cloud tools that IBM Cloud provides for IBMers

Software Engineer I

IBM Brazil | 2021 - 2022

Part of the top talent program

- Writed structured, tested, readable and maintainable code
- Assisted in developing and implemented systems architecture designs, patterns and approaches
- Designed and developed custom components in 4 distinct projects with different stacks, from web to mobile and back to front
- Coordinated with POs to align their needs and created tasks based on them
- Created container images and developed pipelines for CI/CD
- Setted up monitoring for servers and mobile applications
- Attended agile cerimonies and followed agile principles
- Ensured that the applications are accessible following the W3 WAI guidelines
- Developed REST and GraphQL APIs
- Developed complex queries for relational and NoSQL databases
- Assisted in designing disaster recovery plans

Software Engineer Intern

IBM Brazil | 2019 - 2021

- Assisted in Software Development for internal use
- Supported existing developed applications
- Assisted in the management of application containers
- Developed new routes to our APIs
- Developed using coding architectures such as clean code and redux and design patterns such as Factory and MVC

Education

Universidade Anhembi Morumbi

Bachelor's degree in Computer Science | 2019 - 2022
