

Guilherme Santos D'Alessandro

Professional Goals

I aim to attain a mid-level Software Developer position with back-stack emphasis. I hope to develop software that can change people's lives.

Work Experience

Junior Full-stack Software Developer

IBM Brazil | 2020 - Present

- Writing structured, tested, readable and maintainable code
- Assisting in developing and implementing systems architecture designs, patterns and approaches
- Designing and developing custom components in 4 distinct projects with different stacks, from web to mobile and back to front
- Coordinating with POs to align their needs and creating tasks based on them
- Creating container images and developing pipelines for CI/CD
- Setting up monitoring for servers and mobile applications
- Attending agile ceremonies and following agile principles
- Ensuring the applications are accessible for all users regardless of their individual needs
- Developing REST APIs and GraphQL resolvers
- Developing complex queries for relational and NoSQL databases
- Assisting in designing disaster recovery plans

Software Developer Intern

IBM Brazil | 2019 - 2020

- Assisted in Software Development for internal use
- Supported existing developed applications
- Assisted in the management of application containers
- Developed new routes to our APIs
- Developed using coding architectures such as clean code and redux and design patterns such as Factory and MVC
